ITC 341 Spring 2026 **Quiz 3** **Instructor: Dr. Ugur**

Name:_____ Date: 03/06/2026 (Total 20 points, take home, open book & notes)

Type your answers in a Word document called *quiz3.docx*, put your full name on the top, and submit the file on Blackboard.

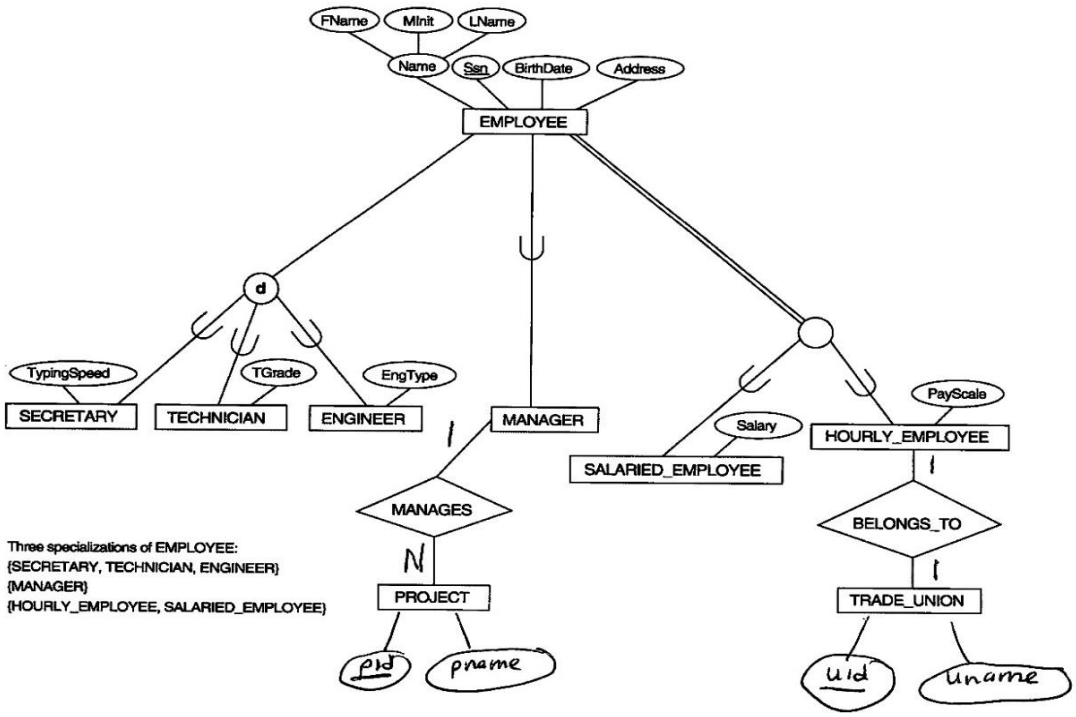
Map the E-E-R schema for the partial ***RevisedEmployee*** database below into a relational schema. Specify all primary keys and foreign keys. For the relational database schema descriptions (i.e., the table descriptions), **use the format shown below for EMP and DEPT tables that are not part of the EER diagram given.**:

/* p-key means primary key, fr-key means foreign key */

EMP (ssn, ename, bdate, dno, salary, superid)
p-key (ssn),
fr-key (dno) references DEPT(dno), /* here (DEPT is another table whose p-key is dno) */
fr-key (superid) references EMP(ssn)

DEPT(dno, dname)
p-key (dno)

FIGURE 4.1. An EER diagram notation to represent subclasses and specialization.



primary-key for PROJECT is **pid**, for TRADE_UNION is **uid**.
MANAGES is 1-to-Many (1 on MANAGER link, M on PROJECT link).
BELONGS_TO is 1-to-1.
SALARIED_EMPLOYEE and HOURLY_EMPLOYEE are disjoint (**d**).
